

Kassensturz confirms: Salt usually offers fastest surf experience in Switzerland!

Yesterday's "Kassensturz" broadcast is a double delight to us. Whether in a big city, in the countryside, in a provincial town or in a village: the samples made show that Salt usually offers faster surfing than competition does – both at day time and in the evening hours.

This finding also recognizes our investment in the acquisition of new antenna sites and the development and optimization of existing antennas. No wonder, because our motto when it comes to internet connection has always been: full speed ahead!

A streaming wisdom, which now stands bravely for several years, is thus confirmed: for those customers for which watching videos on smartphones is important Salt is an ideal candidate when it comes to choosing their mobile operator. This is above all due to the fact that Salt always offers the fastest available internet connection, regardless of the selected subscription or PrePay offer.

At Salt our customers surf with a speed of up to 150 Mbit / s. With LTE technology (4G+), maximum velocities of up to 300 Mbit / s can be achieved at selected locations.

More information on the Unlimited Surf offer tested in the Kassensturz-comparison can be found [here](#). Direct link to the comparison table: [here](#).
